General Information

At Heart♥Land Preschool and 4K we use the Montessori Curriculum. This teaching method aims to educate the whole child. The child uses his senses to learn. The materials in the classroom are manipulative in such a way that the child physically uses his body to use the materials in such a way that even the youngest child can understand.

Our goal is to show God's love to the child and help them come to know Him. Each morning starts with devotion and Christian songs are sung in music class. Children attend St. Paul's church once a month with the rest of the school. Parents are invited to join their children at this time.

The teachers work one-on-one with the young child to ensure that they understand what is being taught. This special teaching method also forms a bond of trust and understanding between teacher and pupil. Each class is composed of various ages, within the same plane of development. Older children often mentor younger children in materials that they have already mastered. Children work at their own pace; materials are presented to challenge, but not to overwhelm the child.

Communication between the teacher and parents is a priority at Heart♥Land Preschool and 4K. Progress is reported to parents through verbal and written communication at conferences. Parents are encouraged to call any time throughout the year if they have questions about their child's progress.

Our Mission

To serve the entire family- children and parents, husbands and wives- by strengthening relationships in the home and with God as together we can learn God's promises for a happy and fulfilling life in Jesus, our Savior.

Philosophy

Our program provides support to families through Christian education and guidance in the areas of intellectual and social development.
